HELLO LOVELY,

Thank you so much for joining my class ! I am delighted to welcome you here, within this incredible convention! today, I'm bringing you into my universe and I'm going to share with you all my secrets about making Unicorns !

You know I love unicorns ! It's a bit like a totem animal for me. I like to draw them, paint them and represent them on the faces of children and adults alike ! With them, I aspire to transmit joy, good vibes, smiles and love !

Take your time during this course, progress at your own pace, practice with pleasure ! Don't put up barriers ! If you can't make an item, that's okay ! You will get there in the next few days for sure !

I wish you to have fun and make lots of unicorns everywhere !

With love,
Elodie

2. UNICORN CONSTRUCTION

1- HEAD POSITION

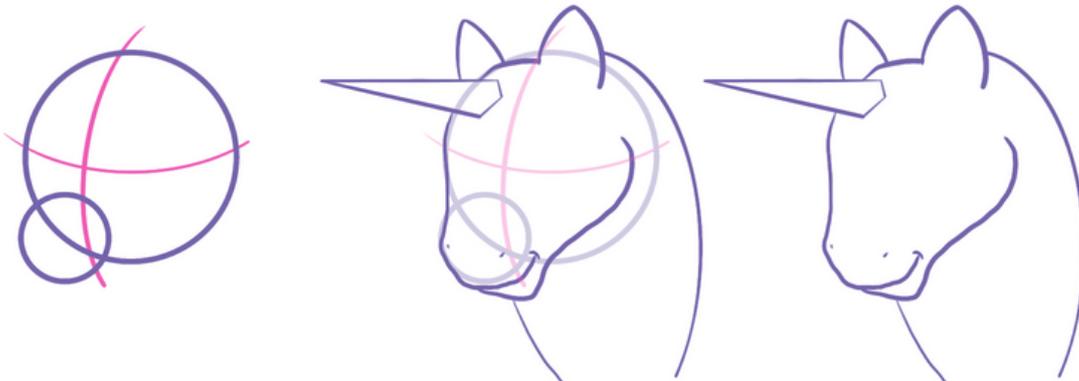

Here are the 3 head positions you need to know to create magical unicorns and have fun with them!

Before starting your practice, I advise you to always visualize the head and the muzzle with circles, it will help you to make your placement.

- Profil view (popular)

- 3/4 view

- Front view

2. UNICORN CONSTRUCTION

2- HEAD & BODY CONSTRUCTION

I show you step by step the construction of my unicorn with clear and simple lines and shapes like a schema !
Once your construction is done, you have to go back to the shapes with more curved and girly lines.

2. HORN

- 3 styles of horn :

Basic

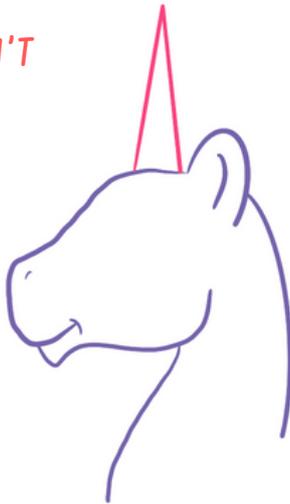

Classic

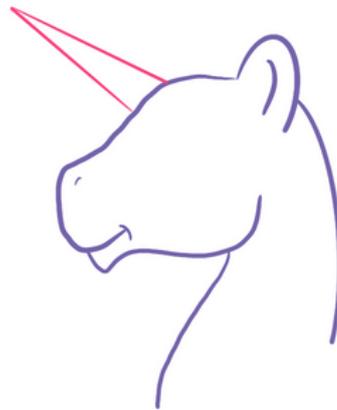

Elaborated
(My Fav !)

- How to place the horn :

DON'T

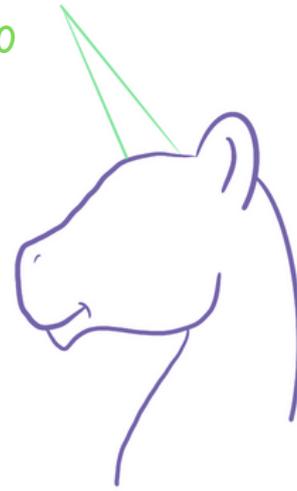

The horn is placed too straight on the head.

The horn is placed too low on the forehead.

DO

The horn is placed at the top of the forehead, close to the ears and tilted.

3. MANE

To achieve a beautiful unicorn mane, it is important to always give it volume and movement !
No unicorn wants a flattened mane ^^

- 4 styles of mane :

Classic : The mane is static.

Original : The mane goes behind the unicorn.

Popular : The mane flies in the wind.

Cool : A crest for Unicorn Boy !

DON'T

The strands of the mane are all straight and of the same length = no movement, no life !

DO

It is important to vary the length and thickness of the strands of the mane (small-medium-big-small-medium) = gives movement and life ! Hooray ^^

4. EYE

The eyes of the unicorns are a super important part of their expression, a pretty look and above all a friendly look!

Well-made eyes will allow you to give your unicorn a pretty expression ^^ I suggest you learn the eyes that I use most often in my designs!

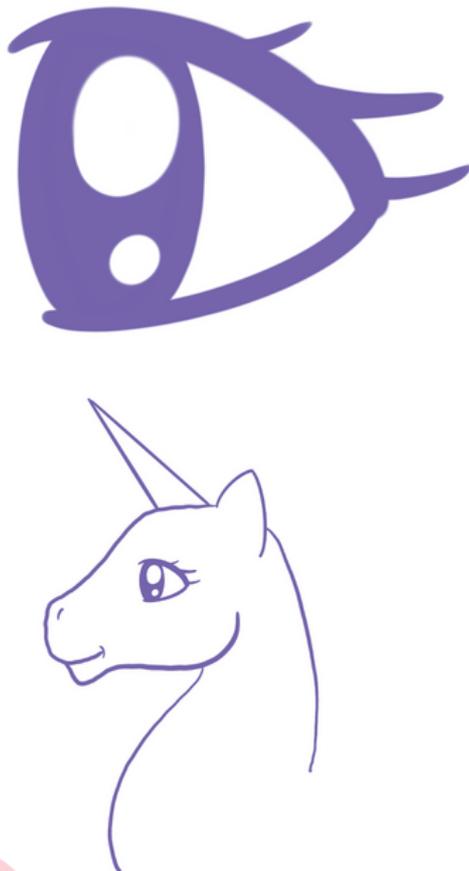

- Happy Eye (fast one !)

- Sleepy Eye

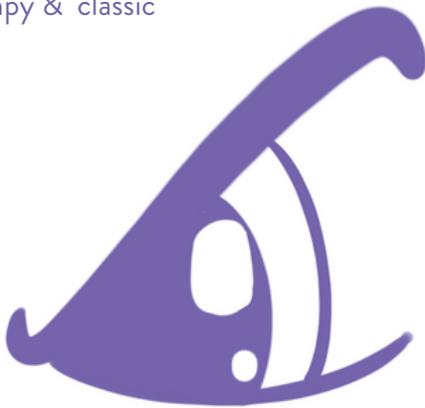

- Classic Eye

- Girly eye : basic & elaborated

- Boy eye : grumpy & classic

5. LEG

I know that sometimes it's very difficult to add legs to your unicorns! You don't know how to place them or how to make them! I show you 3 examples that are easy to do without taking your head and that work very well !

- 1 Leg static

- 2 Legs bent

- 2 Legs stretched in front

5. WING

- Classic

- Elaborated

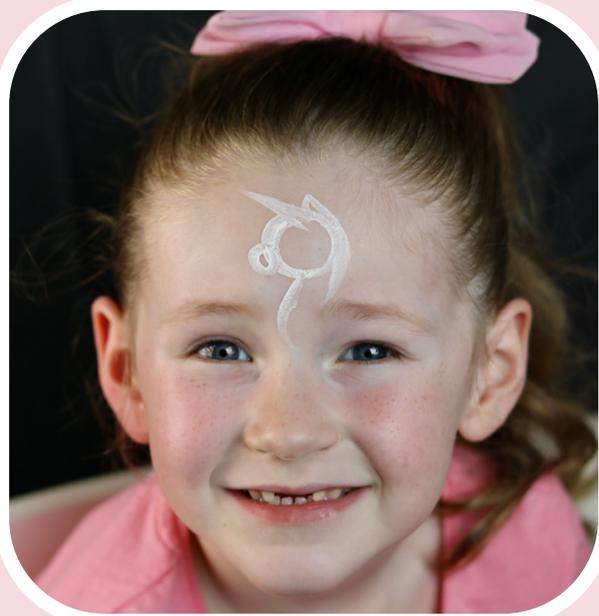

- Closed

3. UNICORN DESIGN

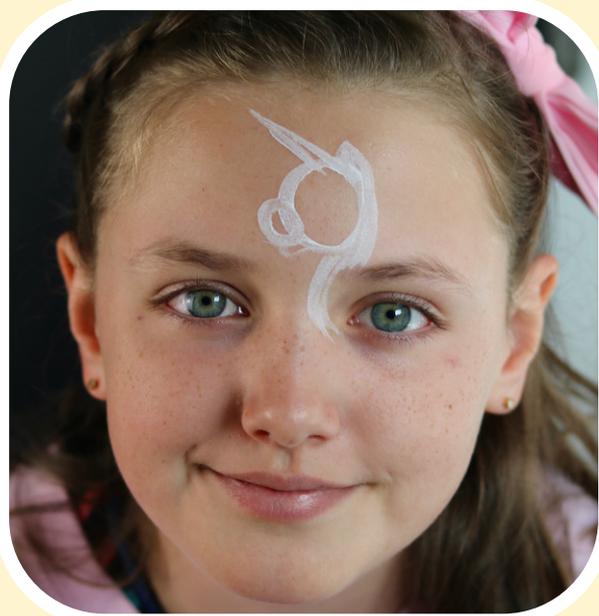

LEVEL 1 - BASIC UNICORN

This unicorn is perfect for a "on the job" design ! It is fast, simple and efficient! I tested it in real conditions on my daughter Molly 😊 She is 4 years old, she is cute but always moves when I tell her not to move !

LEVEL 2 - BASIC UNICORN

Here is the evolution of the first design 😊 I love doing this one in performance! It is more suitable for tall girls because it is a little easier to add details. Anaïs, 10 years old, made an excellent model !

LEVEL 3 -ELABORATED UNICORN

On a more adult model or on yourself you can exploit the power of the unicorn even more and have fun creating a more sophisticated mane, a more girly eye, refining your teardrops ! You can take the time to work on each element ! with a little practice you will see that you can also include it in your gigs

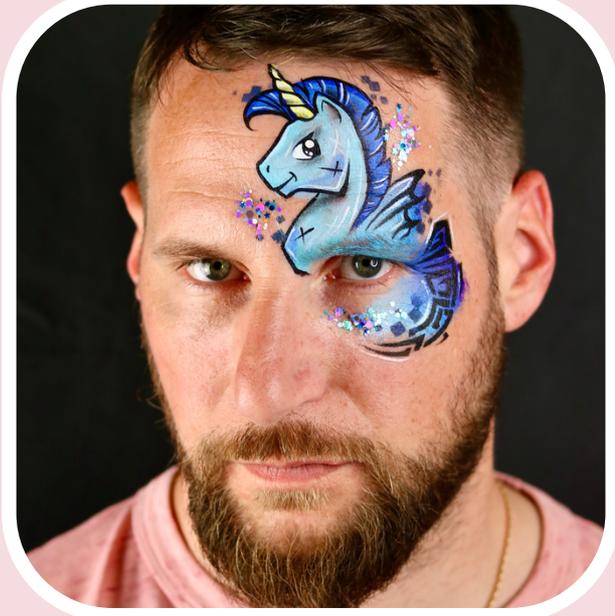

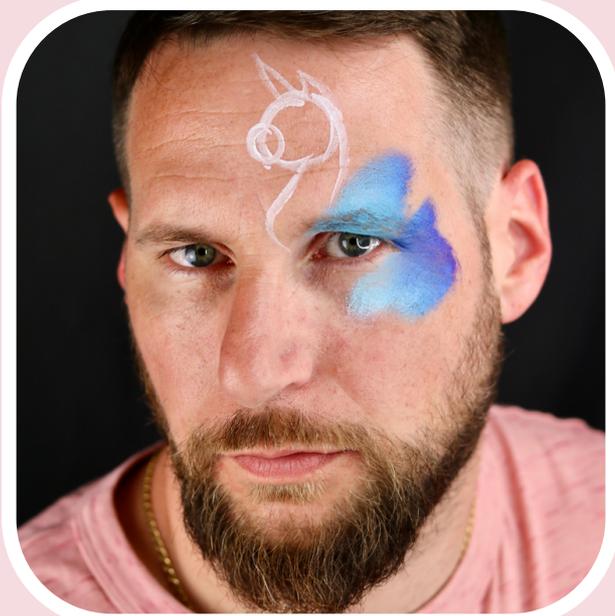

LEVEL 4 - UNICORN QUEEN

This one is a great combo !!!!! It's perfect if you want to challenge yourself and increase your unicorn level ! I find this version to be the most magical of all because it really brings the unicorn to life and makes you want to fly with it !

ALL LEVEL - UNICORN BOY/MALE

This face painting is really too cool ! I love doing male unicorns because you can make straighter, tribal lines, play with shapes and I can say that my husband, Benjamin, shows it off perfectly 😊
